

KHUSHAL SINGH RAJPUT

Full Stack Developer · Angular · .NET Core

Ahmedabad, India · rajputkhushal31@gmail.com · [linkedin.com/in/khushalsinghrajput](https://www.linkedin.com/in/khushalsinghrajput) · github.com/khushalrajput

TECHNICAL SKILLS

Frontend: Angular 16–21 · TypeScript · JavaScript · RxJS · Angular Signals · PrimeNG · TailwindCSS · Bootstrap · HTML5/CSS3

Backend: C# · .NET 8/9/10 · ASP.NET Core · Web API · MVC · Minimal APIs · Entity Framework Core · EntityLite ORM · SignalR · MediatR

Architecture: Clean Architecture · CQRS · REST APIs · Microservices · RBAC · Result Pattern · Agile / Scrum

AI: Local LLM Integration (LLamaSharp)

Databases: SQL Server · MySQL · PostgreSQL · SQLite

Development & AI Tools: Git · GitHub · VS Code · Cursor · Claude Code · GitHub Copilot · Antigravity · Postman · Swagger / OpenAPI · SSMS · Visual Studio

Testing & DevOps: SonarQube · GitHub Actions

PROFESSIONAL EXPERIENCE

Software Engineer — Bacancy Ahmedabad, India · Jan 2024 – Present

- Delivered and maintained **4+ enterprise production systems** across pharma, govtech, and real estate using Angular 16–20 and ASP.NET Core / .NET 8/9 — from inception to release.
- Built .NET APIs, Angular modules, and a **self-learning** correction loop around an **AI invoice-extraction pipeline**, cutting manual data entry by **~40%** across multi-country pharmaceutical operations.
- Led **Angular 14→18 and .NET Core 6→8 migration** across 12+ modules with zero downtime, removing deprecated APIs and improving build performance.
- Engineered fine-grained **RBAC** with user–position–organization hierarchies, feature-level permissions, and audit logging for enterprise compliance.
- Drove code quality with SonarQube — resolved **30+ vulnerabilities and code smells**, raising project rating from C to A.

KEY PROJECTS

Invoice Automation System — Pharma

Angular 19 · .NET 9 · Azure AI Document Intelligence · Power Automate · SQL Server · PrimeNG

- AI-powered platform ingesting vendor invoices (FTP/SFTP/OneDrive) through an Azure OCR pipeline to auto-extract structured data across multi-country operations.
- Built a **self-learning correction loop** — field errors captured as per-country trim patterns and auto-applied to future invoices, progressively reducing manual edits.

Registry Management System — GovTech

Angular 18 · .NET 8 · SQL Server · EntityLite ORM · SonarQube · Azure · PrimeNG

- Legal operations platform for Spanish agencies and notaries — property registration, inheritance procedures, and financial simulations driven by configurable workflow engines.
- Optimized client-side state and API call patterns, reducing redundant network requests and measurably improving page-load responsiveness.

CareerLens — Personal Project [\[Link\]](#)

Angular 21 · .NET 10 · LLamaSharp (Qwen3-4B) · SQLite · EF Core · SignalR · MediatR · FluentValidation

- Privacy-first AI resume tool scoring resumes against job descriptions and surfacing skill gaps — runs **100% locally** via in-process LLM inference, zero cloud calls.
- Built on **Clean Architecture with CQRS**, Minimal APIs, and real-time SignalR progress streaming to an Angular 21 zoneless / signals frontend.

CERTIFICATIONS

Azure Fundamentals: AZ-900 Exam Prep [\[Link\]](#) — Udemy · 2026

RECOGNITION

Bacancy Quarter Award: Fast-Track Innovator [\[Link\]](#) (Q3 2025)

Bacancy Spot Awards: Excellence [\[Link\]](#), Extra Mile [\[Link\]](#) & Marvellous Performance [\[Link\]](#) (2024–2025)

EDUCATION

B.E., Information Technology (8.96 CGPA) — Vishwakarma Government Engineering College — 2021 – 2024

Diploma, Information Technology (9.83 CGPA) — R.C. Technical Institute — 2018 – 2021
